ENVIRONMENT, HEALTH AND WORK SAFETY POLICY

NISSIN FOODS Magyarország Kft. is engaged to provide health protection and safety at the workplace for employees and other operators being active on site.

The company intends to carry out its operation such a way, that it **establishes safe workplaces not endangering health** with achievable technologies within labour safety, technological, economical conditions of all-times. We ensure in our cup and bag instant noodle production and processing **the healthy and safe workplaces, the careful and efficient usage of resources, the prevention of health impairments, protection of our environment, and prevention of environmental contamination.**

We strive to cause the least possible environmental strain and impact on the environment. We analyze and continuously examine the environmental impacts of the life cycle of our products. **The palm oil** required for the product **comes from a sustainable source**, we strive to **reduce the risk to the environment and human health** and to ensure that they are recycled as much as possible **when purchasing other raw materials**. We ensure the reduction of food waste and environmental emissions (eg. air pollution, sewage water) through **the continuous development of our processes and tools and the conscious and efficient use of these materials**. By selectively collecting food scrap, palm oil waste, packaging waste and other on-site waste, we ensure that they **can be recycled as much as possible**. We are constantly examining the possibilities of recovering waste.

We implement, operate and continuously improve the integrated management system conforming to the requirements of **ISO 14001 and ISO 45001 standards**, and the owners and management of our corporation look after the necessary material and human resources to that. The integrated management system operated by us covers all of our activities, products and services.

Our policy gives a framework to the definition, execution and evaluation of our environmental and work safety objectives. We follow up and evaluate on a regular basis our environmental and work safety performance, **in order to continuously improve our environmental and work safety performance we define objectives and targets.**

During our operation we satisfy the objectives defined by ourselves on the top of the applicable compliance obligations related to environment protection, health protection and work safety.

We carry the obligations and objectives connected to the identified work safety hazards into execution, and all of our associates - actively – participate in it. We ensure with continuous training of our associates that everyone gets to know his tasks and responsibilities related to the management system, as well as our policy and objectives. We promote that they can apply the knowledge acquired here not only in the direct employment, but also in their everyday life. **We ensure the cooperation, open and honest communication with stakeholders.**

By the identification and risk analysis of environmental factors and work safety hazards occurring in our operation and in our processes, and by the measures applied to reduce the risks we ensure the minimalization of environmental impact and health impairment.

We provide consultation opportunities for our employees and we support the establishment of health protection and work safety committee.

We take into our consideration the health protection and work safety aspects at planning and execution of investments and developments, and **we give priority to the application of solutions that prevent health impairments and improve environmental performance.**
